# New curbside carts coming soon!

## What are the changes?

1. In late April, you will receive your new carts. At that time, stop using your old containers and begin filling the new carts.
2. If you would like Hood River Garbage to remove your old garbage cans and recycle bins, follow these instructions:
  - a. Make sure the container is empty
  - b. Mark the container with a note that says, "remove"
  - c. Place the container at the curb on your garbage service day
  - d. Please keep one blue bin for glass recycling
3. Service of the new carts will begin the week of **May 1st**, on your regular service day. The first week will start with service to your **compost** and **garbage** carts.
4. Your service schedule will change. Your new compost cart will be picked up every week. Garbage and recycling will alternate service, every other week.

## What to expect

Over the next few weeks, you will receive more information, including an updated service calendar and a service guide that will explain what goes in each cart, with particular emphasis on the new compost cart.
