Will, evidently none of this sidewalk will be on state right of way. It will all be on private land. Evidently the 5.5 foot wide little spur of land from the tax lot out to the Hwy 100/US30 was meant for a future sidewalk. Carrington says he will put a sign up that advises pedestrians of where the sidewalk goes.

Personally I don't see any issues. And no permitting as long as he does not close the sidewalk during construction. Do you have any concerns?
